PROFILE

Computer Science undergraduate with strong experience in Java, React.js, Node.js, REST APIs, and AI-powered full-stack applications. Passionate about building scalable software using modern engineering practices, Git-based workflows, and strong foundations in DSA, OOP, DBMS, Operating Systems, and Computer Networks.

SKILLS

Programming Languages: Java, JavaScript, Python

Frontend: React.js, HTML, CSS, Context API

Backend & APIs: Node.js, Express.js, REST APIs, JWT

Databases: SQL, MongoDB

AI: OpenAI API, Gemini API, Prompt Engineering

Developer Tools: Git, GitHub, Postman, Vercel, Render, Netlify

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

JOB ORIENTED VALUE-ADDED COURSE - GLA UNIVERSITY, MATHURA

Coding Blocks — Remote

April 2025

Software Engineering Intern

- Developed a full-stack Expense Tracker using the MERN stack and designed robust REST APIs for secure financial data management.
- Improved frontend state management and component rendering performance utilizing React Hooks and Context API.
- Implemented JWT-based authentication protocols and utilized Git workflows within an Agile development environment.

EDUCATION

GLA University

Mathura, Uttar Pradesh

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Jul 2027

CGPA: 7.45/10

PROJECT WORK

- AI Interview Platform** | github.com/prashant8941/AI_interview | ai-interview-al9p.vercel.app
 - Engineered a MERN-stack platform integrating OpenAI and Gemini APIs to dynamically generate role-specific interview questions and real-time feedback.
 - Built an automated PDF resume parsing system for skill extraction and implemented secure REST APIs with JWT for user session tracking.

Tech: React.js, Node.js, Express.js, MongoDB, OpenAI API, Gemini API, JWT

- Stock Portfolio Analyzer** | github.com/prashant8941/stock_portfolio | stock-portfolio-pied-eta.vercel.app
 - Architected a financial dashboard to track live investments, monitor portfolio PnL (Profit and Loss), and visualize asset performance.
 - Developed secure CRUD REST APIs and integrated the Gemini LLM to generate AI-driven portfolio analysis and actionable investment insights.

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs, Gemini API, JWT

AWARDS & ACHIEVEMENTS

- Achieved the **Pupil** rank on **Codeforces** and successfully solved **1000+ Data Structures and Algorithms problems** across various platforms.
- Advanced past the first round of the **Adobe University Hackathon 2026**, developing solutions centered around the theme *"Speak to Agents: The New Language of Brand Visibility"*.

CERTIFICATIONS

JPMorgan Chase & Co. — Virtual

April 2024

Software Engineering Virtual Experience

- Enhanced Python-based backend simulation logic to optimize financial data processing and transaction analysis.
- Developed interactive dashboards using Perspective to visualize real-time stock-market and financial data.
