

Prashant Sharma

ps65854321@gmail.com | +91-8941896499 | github.com/prashant8941 | linkedin.com/in/prashant-sharma

Skills

Languages: Java, JavaScript, Python

Frontend: React.js, HTML, CSS, Context API

Backend: Node.js, Express.js, REST APIs, JWT

Databases: SQL, MongoDB

AI/Tools: OpenAI API, Gemini API, Prompt Engineering, Git, GitHub, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

AI Interview Platform

React.js, Node.js, Express.js, MongoDB, OpenAI API, Gemini API, JWT

- Engineered a MERN-stack platform integrating OpenAI and Gemini APIs to dynamically generate role-specific interview questions and real-time feedback for candidates.
- Built an automated PDF resume-parsing pipeline for skill extraction, reducing manual question customization effort.
- Implemented secure REST APIs with JWT-based session tracking; deployed live at ai-interview-a19p.vercel.app | code at github.com/prashant8941/AI_interview.

Scalable URL Shortener

Node.js, Express.js, MongoDB, Redis, React.js

- Built a URL shortener API with a cache-aside architecture, using Redis to serve repeat redirects and reduce database load.
- Designed a collision-free Base62 encoding scheme for short-code generation from auto-incrementing IDs.
- Implemented a custom sliding-window rate limiter in Redis to throttle per-client requests without third-party middleware.
- Deployed live with a React dashboard for link creation and analytics at url-shortener-frontend-o770.onrender.com; code at github.com/prashant8941/url_shortner.

Awards & Achievements

- Achieved **Pupil** rank on Codeforces; solved **700+** problems on LeetCode and **1000+** Data Structures & Algorithms problems overall across LeetCode, Codeforces, GeeksforGeeks, and HackerRank.
- Advanced past Round 1 of the **Adobe University Hackathon 2026**, building solutions around "Speak to Agents: The New Language of Brand Visibility."

Experience

Coding Blocks

Software Engineering Intern

Remote

April 2025 – July 2025

- Developed a full-stack Expense Tracker using the MERN stack; designed REST APIs for secure financial data management.
- Improved frontend rendering performance and state management using React Hooks and Context API.
- Implemented JWT-based authentication and collaborated using Git workflows in an Agile development environment.

Certifications

JPMorgan Chase & Co.

Software Engineering Virtual Experience

Virtual

April 2024

- Enhanced Python-based backend simulation logic to optimize financial data processing and transaction analysis.
- Developed interactive dashboards using Perspective to visualize real-time stock-market and financial data.

Education

GLA University, Mathura, Uttar Pradesh

B.Tech, Computer Science and Engineering

Aug 2023 – Jul 2027

CGPA: 7.45/10
